### PROFILE SUMMARY

Final-year BS Computer Science student and Full Stack Developer with hands-on experience building production-ready web applications, enterprise software solutions, and client projects. Currently contributing to accounting software integrated with Osquare ERP, used by Aptech Pakistan, while delivering successful freelance applications for clients. Skilled in MERN stack development, dashboard creation, RESTful APIs, and responsive user interfaces. Passionate about solving business problems, implementing secure development practices, and leveraging AI tools to enhance software productivity and quality.

### EDUCATION

#### IQRA UNIVERSITY

- Bcheclor of sciecie in Computer Science

#### FULL STACK WEB DEVELOPMENT COURSE (CERTIFICATE)

- National Vocational and Technical Training Commission (NAVTTTC) – 2025

### SKILLS

- HTML
- CSS
- JAVASCRIPT
- REACT
- NEXT.JS
- Angular
- Tailwind
- BOOTSTRAP
- NODEJS
- EXPRESSJS
- MONGODB
- MYSQL
- OOP
- DSA

### WORK EXPERIENCE

#### Innovador Solutions

##### MERN Stack Developer

MAYT2025 - CONTINUE

- Developing and maintaining enterprise-level accounting software integrated with Osquare ERP, a production system actively used by Aptech Pakistan.
- Building financial modules, transaction tracking systems, reporting dashboards, and user management functionalities.
- Designing and integrating RESTful APIs to enable seamless frontend-backend communication.
- Working on Angular-based modules and backend utilities to improve efficiency and maintainability.
- Troubleshooting production issues and optimizing application performance.
- Collaborating with cross-functional teams to deliver scalable and business-focused solutions.

#### Xgen Technology – Karachi

##### MERN Stack Developer Intern

AUGUST2024-NOVEMBER 2024

- Designed and developed a Learning Management System (LMS) using the MERN stack.
- Implemented user authentication, course management, attendance tracking, and progress monitoring features.
- Developed reporting dashboards and CSV export functionality for administrative users.
- Integrated React frontend components with Node.js and Express.js APIs.
- Participated in testing, debugging, and performance optimization to improve system stability.
- Collaborated with team members using Agile development practices to deliver project milestones

#### Freelance Web Developer

January2023-present

- Architected an immersive, high-performance web interface utilizing GSAP (GreenSock) to implement complex animation timelines and scroll-triggered interactions.
- Engineered a responsive and scalable front-end architecture using Bootstrap and custom CSS3, ensuring seamless cross-browser compatibility and mobile-first accessibility.
- Optimized visual performance by managing DOM manipulations and animation sequences effectively with Vanilla JavaScript, reducing load times and enhancing user retention.
- Oversaw the full Software Development Life Cycle (SDLC), from initial requirement gathering and UI/UX wireframing to final deployment and client hand-off.

# SAHIL

## MERN Stack Developer

### iBusiness Application (MERN Stack)

- Architected an immersive, high-performance web interface utilizing GSAP (GreenSock) to implement complex animation timelines and scroll-triggered interactions.
- Engineered a responsive and scalable front-end architecture using Bootstrap and custom CSS3, ensuring seamless cross-browser compatibility and mobile-first accessibility.
- Optimized visual performance by managing DOM manipulations and animation sequences effectively with Vanilla JavaScript, reducing load times and enhancing user retention.
- Oversaw the full Software Development Life Cycle (SDLC), from initial requirement gathering and UI/UX wireframing to final deployment and client hand-off.

### FINAL YEAR PROJECT

#### SecureFlow

**Technologies:** React.js, Node.js, Express.js, MongoDB, Redis, JWT, Socket.io, GitHub, Postman

- Designed and developed a secure project management platform enforcing Secure SDLC workflows for sensitive banking environments.
- Implemented Role-Based Access Control (RBAC) to manage access permissions across multiple user roles.
- Developed a tamper-proof cryptographic hash-chain audit logging system to ensure log integrity and accountability.
- Integrated Redis-based session management and rate limiting to strengthen application security.
- Built a rule-based intrusion detection module for identifying suspicious activities and generating security alerts.
- Developed an admin dashboard for monitoring system activities, reports, and security events.
- Applied secure API development practices, validation mechanisms, and security testing methodologies throughout the project lifecycle.

### KEY ACHIEVEMENTS

- Contributing to accounting software integrated with Osquare ERP, actively used by Aptech Pakistan.
- Successfully delivered and deployed the iBusiness application, currently being used by the client in production.
- Built secure enterprise solutions through a banking-focused Final Year Project implementing Secure SDLC principles.
- Developed production-ready dashboards, reporting systems, and administrative portals across enterprise, internship, and freelance projects.
